Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121.

I. Claims 42-44 are drawn to a method for retrofitting a sheet metal structural element, classified in class 52, subclass 742.14.

II. Claims 29-41 are drawn to an apparatus of a layered structural element, classified in class 52, subclass 415.

The inventions I and II are related as process of making and product made. The inventions are distinct if either of the following can be shown:

(1) that the process as claimed can be used to make other and materially different product or

(2) that the product as claimed can be made by another and materially different process.

For instant case, the apparatus claims could be made by a method different than that group I such as making a layered structural element would made out of different layers of aluminum alloy materials.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

Restriction to one of the following inventions is required under 35 U.S.C. 121.

A telephone call was made to request an oral election on 6/29/2009, but did not result in an election being made.
